DATE OF INFORMATION

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTION 793 AND 794, OF THE U.S. CODE, IS HEREBY CLASSIFIED "CONFIDENTIAL" AND ITS DISCLOSURE TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

1. There is a central sewerage system in Lodz although not all streets are connected to the main line. The sewerage goes to a filter plant on the outskirts of town and the waste goes into the Lodzka River.
2. [redacted] the main sewer runs along Piotrkowska Street. [redacted] nothing has been done to the system in recent years.
3. There is a shortage of water in Lodz. Not all homes have running water and central water dispersal points are allocated. Normally at an appointed time each morning, people have to stand in line to get water. A new pipeline is being built at present from Tomaszow-Mazowiecki (known as "Blue Wells"), about 50 km away, on the Pilica River. This pipeline should be finished in about 1954 and is about 30" in diameter, iron, underground.
